
Modes and means of transport

Transport

Human keep on moving from one place to another. In old times carts pulled by animals or horses were very famous and preferred means of transport.

Modes of Transport

3 modes of transport are : **Land, Air and Water.**

Land transport

This is most **common** mode of transport. Vehicles like cars, bicycles, bikes, scooters are very famous means of land transport. Railway is another mean of land transport. Railway is preferred for long distance travelling. Bicycles are preferred for very small distance travelling.

The **airway** is the **fastest mode** of transport but it is also the **costliest mode** of transport. Airplanes and helicopters are means of air transport.

Water in **cheapest** way to transport goods between 2 cities or 2 countries but it is also the **slowest**. Boats, ferries, ships are means of water transport.

Train, car, bus can be used to travel between 2 cities.

Scooters and bikes are generally used to cover a long distance within a city.

Train is preferred over car for very long distance.

Train, bus and aeroplane are public means of transport.

Car, bike and scooter are private means of transport.
